SUMMARY

Passionate Software Engineer with a relentless drive to learn emerging technologies and build **life-changing applications** that make a tangible difference. I thrive at the intersection of innovative problem-solving and user-centered design. My journey—from developing mental health apps to leading teams for non-profit CRMs—has instilled a deep commitment to **continuous growth**, **collaborative development**, and **delivering scalable solutions** that improve lives. Eager to contribute to a forward-thinking team where I can expand my technical mastery while creating meaningful impact.

PROFESSIONAL EXPERIENCE

Smart-Tech Solutions

July 2024 – Sep 2024

Software Engineer Intern

Islamabad, Pakistan

- Engineered a full-featured **employee management system** using **ASP.NET Core** and **SQL Server (SSMS)**; implemented **CRUD operations** for employee data, payout tracking, attendance monitoring, and progress reporting—reducing manual administrative work by **60%**.
- Redesigned legacy frontend interfaces using **React + Vite** with **Tailwind CSS**; transformed outdated UI into modern, responsive components—improving user experience and reducing page load times by **40%**.
- Collaborated in an **Agile team environment**, participating in daily stand-ups, sprint planning, and code reviews to deliver features on schedule.

Strive Health & Foundation

Feb 2025

Volunteer Software Engineer

Islamabad, Pakistan

- Architected a **full-stack CRM web application** for internal operations using **ASP.NET Core**, **Bootstrap**, and **phpMyAdmin (MySQL)**; enabled seamless management of employee records, visitor logs, and donor information for a healthcare non-profit.
- Led a team of 5 junior developers** through the entire SDLC—from requirements gathering and database design to deployment; conducted weekly code reviews and mentorship sessions to ensure code quality and best practices.
- Implemented secure **authentication & authorization** to restrict sensitive donor and employee data, ensuring compliance with data privacy standards.

Sharims Solution

Sep 2025 – July 2026

Junior Software Engineer

Remote

- Collaborate with senior developers to build and maintain **production-grade web applications** using **React + Vite**, **Tailwind CSS**, and **Firebase** backend services.
- Contribute to the development of the company's flagship product—**Sharims Solutions Website**—implementing new features, fixing bugs, and optimizing performance for improved user experience.
- Actively participate in **code reviews**, **sprint planning**, and **technical discussions**; learn industry best practices for scalable architecture, CI/CD pipelines, and cloud deployment.
- Assist in integrating third-party services including **Tawk.to** (live chat) and **Email.js** (automated communications) to enhance client engagement.

PROJECTS

Web Applications

- Sharims Solutions (Corporate Website)**: Engineered a production-grade marketing website using **React + Vite** with **Tailwind CSS**; integrated **Firebase** for backend services, **Tawk.to** for live customer engagement, and **Email.js** for automated lead capture forms. **Optimized performance significantly** by implementing **image caching strategies**, lazy loading, and code splitting—reducing page load times by **60%** and dramatically improving user experience.
- Skincare E-Commerce (RBAC)**: Architected a full-featured e-commerce platform with **role-based access control (RBAC)** for secure product and cost management. Built with **React + Vite**, **Tailwind CSS**, and **Supabase** for scalable cloud storage and authentication.

- **Carrefour** Developed a **Carrefour grocery clone** with **ASP.NET Core** and **Bootstrap**; designed a responsive frontend with product catalog, cart functionality, and order management; optimized database queries in **SSMS** for improved load times.
- **Strive Health & Foundation (CRM)**: Developed a robust CRUD application to manage employee records, visitor logs, and donor details for a healthcare non-profit. Utilized **ASP.NET Core** for the backend API, **Firebase** for data persistence, and **Email.js** with **Tailwind CSS** for a polished frontend.

Mobile Applications

- **MindCare (Mental Health App)**: Built a cross-platform Android application using **Flutter** and **Dart UI**, featuring secure **Firebase Authentication**, cloud storage, and an AI-powered chatbot via **Open Router APIs** for personalized mental health support.
- **MindEase (Mental Health App)**: Developed a second mental health platform using **Flutter** with **Supabase** for authentication and storage, integrating a custom chatbot through **Open Router APIs** to provide accessible and empathetic user engagement.

EDUCATION

Capital University of Science and Technologies

Graduated December 2025

Bachelor in Computer Science

Islamabad

- **Coursework**: Data Structures, Algorithms, Databases, Computer Human Interaction, Machine Learning, Web Development, Project Management, Parallel Computing, Cyber Security.

TECHNICAL SKILLS

Languages : Flutter (Dart), React (Vite), ASP.NET Core, JavaScript, TypeScript, HTML5, CSS3, SQL.

Cloud & Backend : Firebase, Supabase, Open Router APIs, Email.js, REST APIs, PostgreSQL, MySQL

Tools & Design : Git, Figma, Google Analytics, Tawk.to, Tailwind CSS, CI/CD

Core Expertise : RBAC(Role Based Access), CRUD Systems, Cross-Platform Mobile, Authentication, API Integration

Spoken Languages : English (Fluent), Urdu
